

ResourceTbl Table (I m using Oracle and Sql Developer Client)

1. CREATE TABLE Statement

2. Insert rows into it

3. Table data

The screenshot shows a database query tool interface. At the top, there's a toolbar with various icons and a status bar indicating '0.171 seconds'. Below the toolbar, there's a 'Query Builder' tab where a SQL query is entered: `select * from resourcetbl;`. Below the query builder, there's a 'Script Output' tab showing the results of the query. The results are displayed in a table with three columns: RESNO, RESNAME, and RATE. The table contains six rows of data. Below the table, it says '6 rows selected.'

RESNO	RESNAME	RATE
R100	attendant	10
R101	police	15
R102	usher	10
R103	nurse	20
R104	janitor	15
R105	food service	10

6 rows selected.
